

Linda White - 2016

When asked if she is married, Linda replied "Nope". She was born in Logansport IN and grew up in Rochester IN, making her a Hoosier through and through. She has lived in the Indy area for 16 years. Currently, Linda works part time for the City of Carmel. She retired in 2009 from Sprint as an IT Project Manager. Since she is not completely retired, Linda is only 'kinda' enjoying retirement. She works part time for 'fun money'. The best thing about her part time retirement is being able to spend more quality time with her family and friends. Linda's favorite interests and activities start with gardening (flowers, trees, and shrubs - no veggies). She is co-President for the Hamilton County Master Gardener organization. In addition to her gardens, Linda enjoys working with her hands in many forms of crafting, sewing, jewelry making, crocheting and home decorating. And then of course, Linda also enjoys taking the T's out of 'Baby' and going for drives or attending car shows. She has been a member of CI since 2012 and has never been a member of any other Corvette Club. She first got interested in Corvettes in High School and says even then she loved cars with power and beauty. Currently Linda owns 'Baby,' a 1976 Buckskin color coupe and has never owned any other Corvette. What Linda says she likes best about CI is that the people are so warm and friendly, like a big family. And the bonus is all the opportunities to share time with that great family. For favorite CI activities Linda enjoys pretty much everything, but she especially likes Drive n Dines and Car Shows. Linda's favorite Corvette story involves when she bought 'Baby'. She bought the car in Rochester from a guy who was storing it in his barn. She and her daughter drove to get the car and were on their way back to Westfield on 31, headed south out of Kokomo when it began to rain steadily. Linda had no idea where the windshield wiper switch was but finally found it and turned them on. Two swipes and she watched as her wiper flew off the car and landed on the side of the road. After a bit of a search, in the rain, Linda and her daughter found and reattached the wiper blade and were 'on the road again'
